

Directions for use:

I. Fields Crops	Time of Application	Intervals (Days)	Rate (Tbsp/16 L)
Rice: Direct Seeded	Start application at 15 days after seed germination.	10	4-6
Transplanted	Start application at 12-15 days after transplanting.	10	4-6
Corn	Start application at 4-5 leaf stage.	10	6
Cotton	Start application at 4-5 leaf stage.	15	6
Pineapple	During entire growth.	15	6
Tobacco	Start application at 4-5 leaf stage.	15	4-6
Sugar Cane	Start spraying 45 days after planting or ratoon	30	6-8

II. Fruit Trees

Mango	Apply at 7-14 days before flower forcing.		6
Durian	Start application at 21 days after planting	15	6
Citrus	Start application at 21 days after planting.	15	6
Banana/Coffee Cacao	Growth Stage	15	6

III. Vegetable/Vines

Tomato	Start application at 7 leaf stage.	10	4-6
Cabbage	Start application at 14 days after transplanting.	10	4-6
Cauliflower	Start application at 14 days after transplanting	10	4-6
Grapes	Start application at 7 leaf stage.	15	6
Melon	Start application at 5 leaf stage.	15	6

**Maximize benefits. Spray after rain or irrigation.
Spray early morning or late afternoon.**

BATCH NO. _____ **DATE OF FORMULATION:** _____

PRODUCT CHARACTERISTICS:

✓ 100% soluble nutrient spray that can be applied to fruits and other crops at early stage leaving little or no visible residue at harvest.

✓ Safe and effective source of immediately available plant nutrients. Particularly suitable for fast growing field, vegetable, and nursery crops.

✓ Uniform in analysis. Every drop contains the same analysis.

✓ Can be used as both spreader and acidifier.

✓ Contains chelating agents to assure availability without precipitating the major and microelements, including most pesticides and fungicides.

✓ Contains no chlorides.
